OUR HISTORY

Experienced in Custom Ag

Almendros Inc. was originally founded in 1981 by **Robert Potter**.

At the time, **Sam Hanes** was the manager of both Almendros and Poso Creek Farms.

In 1987, Almendros was purchased by Sam Hanes, **Eric Merz** and **Robert Merz**.

They added some of the first down the row chipping machines in the area.

In 1995 the company merged operations with Merz and Merz,

which then added almond harvesting and pest control to their offered services.

Almendros continued to grow over the years and was able to add tower pruning, hand pruning and shredding to the services list. In 2014, **Luis Medina** came to the company as an intern. He decided to stay and in 2019 he became a partner.

Luis oversees all the current field operations.

PEST CONTROL

EQUIPMENT

10 - PTO AIR-O-FAN Sprayers

10 - Engine AIR-O-FAN Sprayers

4 - Pull Behind Herbicide Rigs

**With capability to add Berm Blaster Blowers*

We offer a variety of agricultural pest control services. Almendros can service all your pest control needs with our properly calibrated orchard and berm sprayers.

01

ORCHARD SPRAY FLEET

Our orchard spray fleet consist of 20 spray rig sets. We have a total of 10 PTO operated sprayers and 10 engine powered sprayers. This gives us the ability to diversify our capacity to service different crop types and tree ages. We normally run fleets of 8 rigs and average 3 acres/ hour/ machine when operating at 2 MPH applications. With this amount of spray sets we cover up to 240 acres per shift but can easily double coverage by adding more equipment should the job require it!

HERBICIDE SPRAY RIG SETS

We have 4 herbicide spray rig sets that operate at about 5 acres/ hour/ machine. On average we cover 150 acres per shift. We also have the ability to operate and attach berm blaster blowers along with our herbicide spray sets to blow off leaves and debris in order to ensure better coverage to targeted weeds.

PEST CONTROL

PRUNING, HEDGING, TOPPING & SHREDDING EQUIPMENT

2- Rears Engine Pull Behind Shredders

1- TOL Dual Boom Topper Hedger

Almendros can help you keep your orchard healthy, clean, and free of brush. We can be a one stop shop that will help you prune, top, hedge, and shred your orchard.

02

REARS ENGINE PULL BEHIND SHREDDERS

The self powered Engine Shredder will take rows of orchard brush and process down to splinters. A 400 horsepower John Deere™ engine is the center of a stout drive train. 108” cutting width. 136” overall width. Height 84”; Length, pintle to bumper, 240”

TOL DUAL BOOM TOPPER HEDGER

The HDR1100LXT T4 is a medium-duty machine designed to meet the growing demand for a dual boom, topper hedger able to hedge as narrow as 2 feet.

Specifications:

- 🌿 Cutting Pass (per side): 11ft
- 🌿 Min Hedging Width: 2ft
- 🌿 Max Hedging Width: 12ft 10in
- 🌿 Max Hedging Height: 28ft 10in
- 🌿 Max Hedging “A” Cut Angle: 30 degrees
- 🌿 Max Flat Topping Height: 22ft 9in

- 1** - Weis MCNair tractor mount V Sweeper

*Almendros offers a complete package
of almond harvest services.*

*We take pride in ensuring that your almonds
are shaken, swept, & picked up on time.*

SHAKING CAPACITY

During harvest season our shaking capacity runs at about 1.75 acres/ hour/ machine. With our current equipment and manpower that equates to up to 130 acres per shift. We take extra care to ensure that our equipment is properly serviced and lubricated to avoid barking and harming trees.

SWEEPERS

Our sweepers round up at about 1 acre/ hour/ machine. On average this gives us coverage of up to 80 acres per shift.

HARVESTERS

Harvesters usually run at about 1.5 acres/ hour/ machine. Coverage may vary depending on field conditions, crop size & turnout but we average around 75 acres per shift.

The background of the entire page is a light grey, textured surface. It is decorated with various illustrations of almonds and almond blossoms. On the left side, there are several almond shells, some whole and some cracked open to show the kernel, along with almond blossoms and leaves. On the right side, there are more almond shells and blossoms. The illustrations are done in a simple, line-art style with some orange and brown tones.
